

Garden Valley Ranch Estates Road Maintenance Report for February 18, 2022

Clearing of Culverts and Roadways -

Received a phone call that the area near Rollercoaster and Johntown Creek Road was flooded due to a clogged culvert. With the help of James Simms leaves were removed and flow was restored.

School Bus Shed Revamp - Update from Louie.

Huge appreciation to Louie for going above and beyond for his work on our new storage shed.

Street Line Painting -

I have contacted James Simms. We are focusing on a workday for early spring. Would like to have 5 to 6 volunteers to assist as a work crew (traffic control. paint application). Expect James to be on site to advise. Currently working with team to pick a project date.

School Bus Stop (corner of Chrysler & Rollercoaster) –

Need work group to evaluate extent of project to reposition/return structure to original foundation. We may need one or two tractors to assist in realignment.

Below find pictures of the storage shed with newly added security window and door.
